

Hear the truth™

JBL ONBEAT VENUE™ WIRELESS ENTERTAINMENT SPEAKER

Wireless loudspeaker dock that turns your iPad into the life of any party.

LEGENDARY SOUND SINCE 1946

TURN YOUR iPad INTO AN ENTERTAINMENT POWERHOUSE.

Ready to take your iPad experience into a new realm of entertainment? Meet the JBL OnBeat Venue™, a wireless loudspeaker dock designed to bring out the best in your favorite tablet device. Experience the music, movies, videos and games on your iPad in true, JBL® high-definition sound – you can even play them from your big-screen TV. Download the free MusicFlow™ app to fully control your listening experience: Create personal playlists, edit mixes and display album artwork. With the JBL OnBeat Venue, you can even view photos and album art on your TV. The sleek, compact loudspeaker also features a unique pullout dock that fits neatly in any room, and comes in colors that match your iPad and home décor.

KEY FEATURES

JBL ONBEAT VENUE™ iPad WIRELESS ENTERTAINMENT DOCK

Hear the truth™

Shift your entertainment experience into high gear with high quality JBL sound, plus benefits designed to bring out the best in your iPad.

Wireless audio streaming

Listen to music, watch movies and play games – and do it all wirelessly. The JBL OnBeat Venue is designed to make your iPad entertain, but it works with your iPhone, iPod touch and virtually any other audio player equipped with *Bluetooth*® technology.

HARMAN TrueStream technology

Because there are many connectivity options when it comes to *Bluetooth* technology, our engineers always use the most current and most advanced. HARMAN TrueStream technology guarantees that you will experience the best possible listening experience when streaming via *Bluetooth* technology, no matter the application or source device.

Powerful JBL drivers

JBL two full-range transducers + two tweeters design provide you with room-filling sound. Experience clear highs and mids, and exceptional bass – the true JBL sound you've come to love.

Slipstream port technology

Slipstream port technology provides listeners with powerful, great-sounding bass with low distortion. It doesn't matter if it's docked or streaming, you'll not only hear real bass, you will feel it.

Component video out to TV

Send the movies, games and images on your iPad to your big-screen TV. Just connect a component video cable (not included) to experience all your multi-media content in large format.

Auxiliary input for additional source devices

Whether your device is *Bluetooth*-enabled or not, the JBL OnBeat Venue allows you to take full advantage of its incredible sound – thanks to the aux-in connection. Use practically any digital audio device, including MP3 players, smartphones, tablets and laptop computers.

Free MusicFlow app

The free downloadable app gives you the freedom to customize your listening experience – all from your *Bluetooth*-enabled device. Create custom playlists, edit mixes, adjust volume and EQ settings and browse album artwork.

User-friendly EQ settings

Access and personalize your EQ settings from the speaker or from your iPad. An easy-to-use display allows you to tweak highs, mids and lows to your liking – pump up the bass quickly for dance music or create a balanced mix for movies and games.

Dock charger for iOS devices

The JBL OnBeat Venue is designed to work seamlessly with your iPad and other devices with iOS software – and this means charging them while docked, too. So when you're ready to undock and take on the day, so is your favorite listening device.
