

JBL® GT-BassPro12

12" (305mm) car audio powered subwoofer system
The easiest way to add high-output, low-distortion bass to any system

The JBL® GT-BassPro12 powered subwoofer pumps out lush, car-rocking bass through a design so cool you won't want to hide it in your trunk. The patented Slipstream port design delivers deep bottom end while minimizing turbulence. Turbulence, or port noise at high volume, isn't just annoying; it's a signal that the port is no longer working and you're getting less bass than you paid for. The Slipstream design is carefully optimized for the combination of woofer, amp and enclosure, and no other company has it. Compared to the competition, Slipstream eliminates port noise and – provides more bass than you've paid for. And with the included remote control for drive-time adjustments, the only time you'll need to stop is for petrol.

FEATURES

ADVANTAGES

BENEFITS

12" (305mm) polypropylene cone with rubber surround	Cone and surround materials are impervious to harsh in-car environment	Longer service life, unmatched reliability
Die-cast aluminium basket	Maintains alignment of moving parts	Consistent performance
Built-in 150-watt RMS amplifier with 450-watt peak power	Amplifier is precisely matched to woofer	Simplifies purchase and installation
Remote level control	Controls volume levels from the driver's seat	No need to pop the trunk
Progressive spider	Controls cone motion at excursion limits	Reduced distortion
Vented polepiece	Increases cooling to woofer motor structure	Increased thermal protection and reliability
Slipstream port	Eliminates port noise	Improved output and woofer protection
Input-level, low-pass, bass-boost and phase controls	Fine-tune woofer performance	Easy to get the right sound
Speaker-level and line-level inputs	Easy to connect with any audio system	Adaptable
Signal-sensing automatic turn-on with defeat switch	Automatically turns the subwoofer on and off when the head unit sends an audio signal; can be defeated for use with aftermarket radios that include a remote turn-on lead	Easily hooks up to any system
Oversized speaker protection bars	Protect the woofer	Cool, muscular look
Oversized connection terminals	Accept heavy-duty speaker wire	Deliver all the power you paid for
